

# Luther Park

## Camping and Retreat Center

Danbury, Wisconsin

### Summer 2021 Luther Park COVID Safety Plan

This plan is not final, it is still being edited and updated as protocols and recommendations change.

Last updated on 12-16-2020

#### Communication

COVID-19 updates will continue to be posted on our Website, Facebook and sent in emails to registered camp families. This information can be found under the “COVID-19 updates” tab on our website

[www.lutherparkdanbury.com](http://www.lutherparkdanbury.com) .

#### Health Screening

Campers will be asked to complete a two week pre-camp health screening before they arrive to camp. Information about this pre-camp screening will be sent three weeks before the camper is set to arrive to camp.

Upon arrival, the campers will undergo a quick health screening with our Health Care Supervisor and/or our Health Care Assistants and/or volunteer Camp Nurses.

Campers and staff will be asked about COVID symptoms and have their temperature taken daily while at camp.

#### Face Masks

Face masks will be mandatory when

- campers, staff and guests are in indoor, public spaces, except when eating or sleeping.
- campers, staff and guests are outside and social distancing is not possible.
- the camper’s camp pod is interacting with another camp pod.

#### Social Distancing

While at camp, camper pods will be required to social distance at all times from each other. Campers within pods will also be asked to social distance as much as they can. Reminders will be placed around camp, staff will help ensure distancing and certain precautions will be taken to help pods, campers and people stay distanced (i.e.: during mealtime, during games, etc.).

#### Camp Pods

A “camp pod” is essentially a cabin group (a small group of campers that campers are sharing a cabin/sleeping space with). Camp Pods are not required to wear a mask with each other. However, if Camp Pods gather to do a social distanced activity, face masks will be required for all participants.

For 2021, Camp Pods (cabin groups/non-masked groups) will be a limited number of people unless the proper health screening, quarantining and agreement is made with all group members, their parents/guardians and the Luther Park Staff.

Some large group activities that have traditionally happened at camp will not be happening this summer because they is no safe way to participate. However, camp staff have thought of creative, safe, large group activities where groups can socially distance and participate as a large group.

#### Sanitation

All across Luther Park ministries, we are using a “Sani in/Sani out” method of sanitization. This means that every building and every activity has a “Sanitization in” and “Sanitization out” policy where a sanitization process of hands/supplies/etc. happens when entering and exiting a building and/or before and after the activity.

**Check-in/Pick-up**

Check-in/Pick-up will be done in a drive thru style. Families will stay in their car until directed by the Luther Park Staff. Families will be directed to different stations (check-in, health screening, etc.) that will be staffed by the Luther Park staff.

\*\*\*Policies are subject to change by recommendations of the Minnesota and Wisconsin Health Departments, American Camp Association, the local Burnett County Public Health Department and/or the CDC. These are just some of the policies Luther Park is implementing for summer 2021. To see the full set of policies please visit [www.lutherparkdanbury.com](http://www.lutherparkdanbury.com) and click on our "COVID-19 updates."
